

JustSystems' xfy XBRL Report

Enables exploring, viewing and reporting on complex XBRL data

JustSystems' xfy XBRL Report is a powerful, multi-dimensional instance viewer and report composer allowing you to extract and analyze financial data from multiple XBRL documents, connect with data sources such as EDGAR Online or stored in XML document repositories. xfy XBRL Report is designed specifically for rich rendering and visualization of complex multi-dimensional XBRL content. JustSystems xfy XBRL Report, users are able to reuse XBRL content throughout the financial information lifecycle. JustSystems xfy platform enables rapid delivery of practical high-quality yet affordable applications of XBRL technology.

xfy XBRL Report is an entry level desktop application for consuming, creating and publishing complex financial reports to the web and print from XBRL content. With xfy XBRL Report, users are able to combine multiple sources of XBRL content into complex research, audit, financial and web ready documents for easy distribution.

The fact that the XBRL was not designed for human readability creates risk at every phase of the financial information lifecycle — from preparation, review and sign-off of regulatory filings to review and analysis of information for audit, risk assessment, operational and investment decision making purposes. xfy XBRL Report provides a trusted viewing and composing solution enabling preparers, filers, auditors, regulators, researchers, institutional and individual investors to work with and create compliant content and leverage the XBRL standard without adding new costs, risks and complexity.

JustSystems' xfy XBRL Report is designed for:

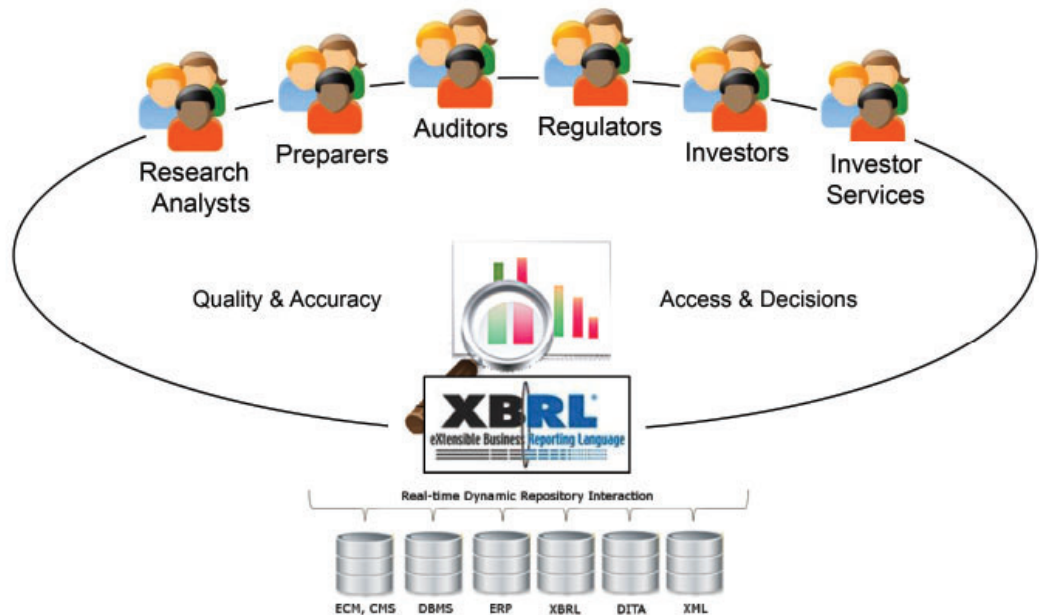

Filers – Providing complete visibility throughout the filing review process with a rich environment for rendering and visualizing your XBRL data to ensure filings are free of errors, oversights and omissions prior to submission. Enabling internal reviews of XBRL filings and providing a value-added service for client-facing reviews, validation and sign-off. Robust connectors enable easy integration with most document management systems enabling better reuse of content, improved compliancy and archiving.

Auditors – Bringing together XBRL and non-XBRL data from multiple sources in a rich visual environment, providing a means to highlight anomalies, present findings, and share content securely for complete review, analysis and attestation of corporate filings.

Regulators – Providing both an internal secure desktop tool for reviewing XBRL filings; composing of findings with linked XBRL content, commentary and analysis of financial data from multiple XBRL documents.

Research Analysts – Providing a rich connected desktop for combining financial content from multiple sources for publication and repurposing for multiple distribution points.

Investors – Allowing individual and institutional investors to take advantage of the transparency and comparability XBRL data provides by rendering and visualizing both XBRL and non-XBRL data from multiple entities and providing a basis to make informed investment decisions.

About JustSystems

JustSystems is a leading global software provider with three decades of successful innovation in office productivity, information management, and consumer and enterprise software. With over 2,500 customers worldwide, the company is continuing a global expansion strategy based on its xfy enterprise software, XMetaL content lifecycle solutions, and its pioneering work in enabling XBRL financial reporting technologies. JustSystems is one of the 2008 KMWorld 100 Companies that Matter in Knowledge Management, a 2008 EContent 100 member, and was recognized on the 2008 KMWorld Trend-Setting Product list for XMetaL. Major strategic partnerships include IBM, Oracle, MarkLogic and EMC.

FIGURE 2: Multiple stakeholders across the financial information lifecycle can now easily view, analyze and combine multiple sources of XBRL content into research, audit, and financial web-ready documents for easy distribution — both to lower the risk of filing errors and to enable key stakeholders to make better business decisions.

JustSystems' xfy XBRL Report enables:

- Instant viewing, extraction, aggregation and analysis of XBRL content — in real time human-readable, richly rendered, styled and formatted
- Viewing of complex multi-dimensional XBRL-tagged reports
- Creation of complex financial documents from multiple XBRL data sources in the same document
- Creation of reusable style templates
- Direct connectivity to multiple online data sources such as EDGAR Online and other XML document repositories
- Distribution of findings, analysis and reports via print, PDF, or web
